Internet Connection / IPv6 Configuration

General DHCPv6 DNS IPv6

IPv6

Link local IPv6 address : fe80::3a07:16ff:fe11:fc5a

Firewall

Enable IPv6 firewall : ☐

Firewall on the secondary prefixes : ☐

Prefix delegation

Be careful if you configure a *Next Hop* for the first subnet, it will no longer be announced by the Freebox on your network. **This will prevent IPv6 dependent devices from working** without a third party router that manages this subnet.

Main prefix : 2a01:e0a:99a:3160::/64

Next Hop :

Secondary prefix : 2a01:e0a:99a:3161::/64

Next Hop : fd00::e228:6dff:fea9:fde1

Secondary prefix : 2a01:e0a:99a:3162::/64

Next Hop :

Secondary prefix : 2a01:e0a:99a:3163::/64

Next Hop :
