

List of countries by number of Internet users

Below is a sortable **list of countries by number of Internet users**, for 2020. Internet users are defined as persons who accessed the Internet in the last 12 months from any device, including mobile phones.^[note 1] Percentage is the percentage of a country's population that are Internet users. Estimates are derived either from household surveys or from Internet subscription data.^[4]

All United Nations member states are included, except North Korea, whose number of internet users is estimated at a few thousand.^[5]

Worldwide Internet users

2005	2010	2017	2019 ^a

World population ^[6]	6.5 billion	6.9 billion	7.4 billion	7.75 billion
Users worldwide	16%	30%	48%	53.6%
Users in the developing world	8%	21%	41.3%	47%
Users in the developed world	51%	67%	81%	86.6%
^a Estimate.

Notes

1. The statistics for numbers of Internet users were obtained by multiplying an estimated percentage of people using the Internet in a given country, obtained from one source (usually the ITU), by the total population from another source (usually the U.S. Census Bureau). There are not enough **significant figures** in the percentage estimate for the precise Internet user counts found in the table to be meaningful. As a result, they should not be treated as precise figures or even reliable estimates.
